Week 2 Deliverable

Excelerate Learning Hub Mobile Application

Learners | Team 4 | Mobile App Development with Flutter Virtual Internship

---

1. Project Summary

Objective

Develop a Flutter-based UI prototype that demonstrates the core learner journey within the Excelerate Learning Hub platform.

Deliverables Completed

✅ Login Screen

✅ Home Dashboard

✅ Quick Access Navigation

✅ Opportunity Listing Screen

✅ Search Functionality

✅ Opportunity Details Screen

✅ Navigation Flow Diagram

✅ GitHub Repository Documentation

---

2. Key Insights from Week 2

Flutter UI Development

Developed multiple user interfaces using Flutter widgets such as:

- Scaffold
- Column
- Row
- TextField
- ListTile
- Card
- ElevatedButton

User Experience Design

Focused on:

- Simple navigation
- Easy access to opportunities
- Clear information hierarchy
- Opportunity discovery

Branding Considerations

Aligned the prototype with the current Excelerate platform through:

- Excelerate-inspired branding
- Opportunity-focused layouts
- Dashboard-driven user experience

GitHub Version Control

Used GitHub for:

- Source code storage
- Documentation
- Screenshot management
- Version control

---

3. User Interface Prototype

Figure 1. Login Screen Development and Output

Purpose

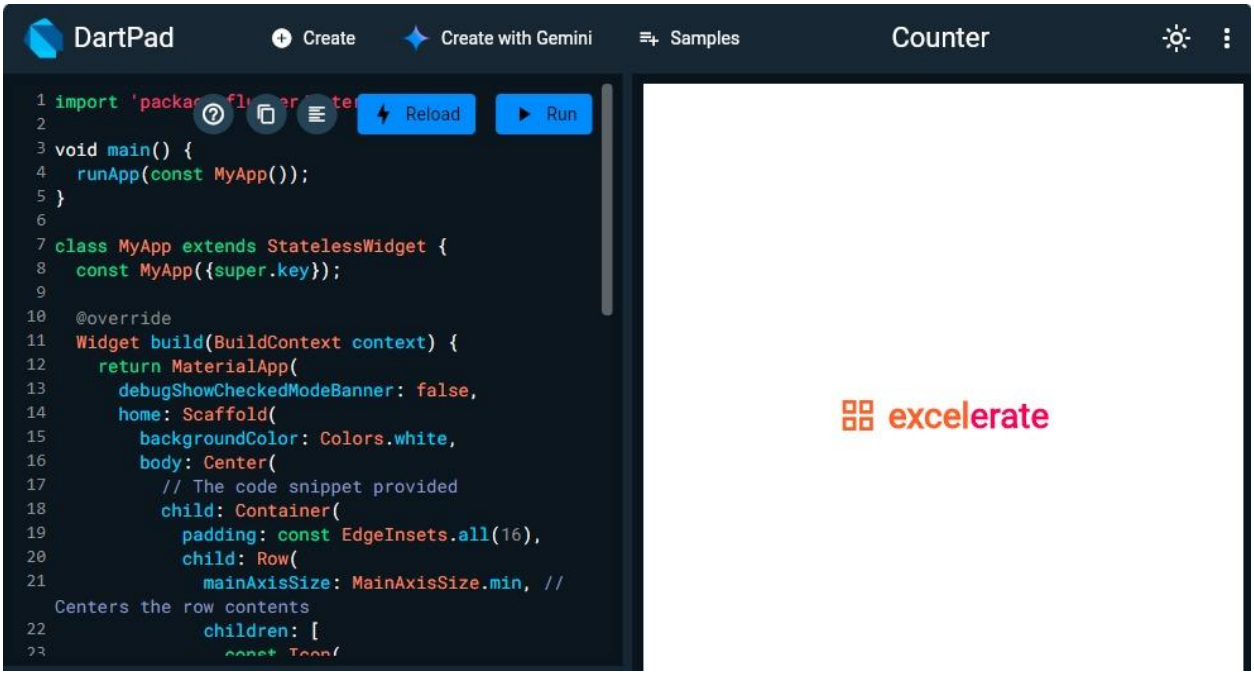

Provides a secure entry point into the application.

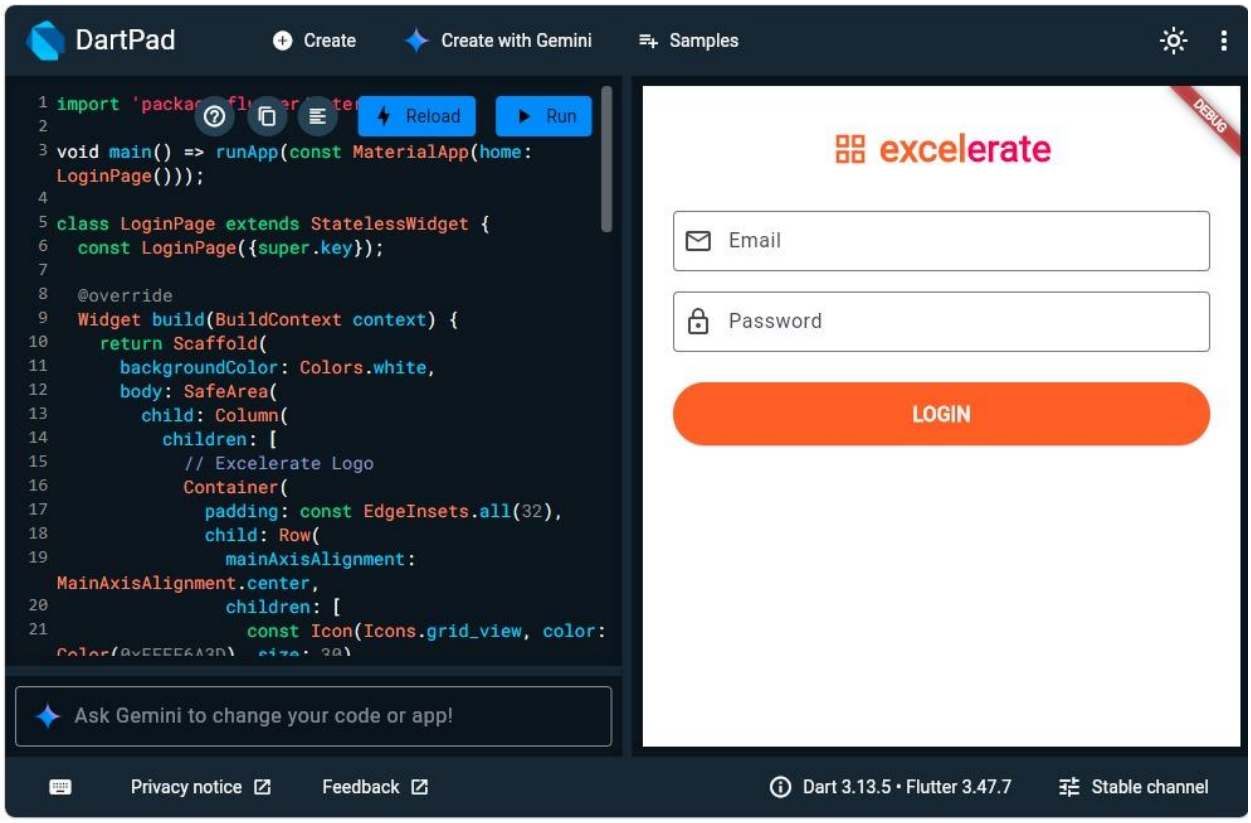

Key Insight

Users can authenticate and access the learning platform through a simplified interface.

Output

Figure 1 Screenshot

Flutter Code Snippet

```
// Login Screen
// Includes branded Excelerate header
SingleChildScrollView(
  child: Padding(
    padding: const EdgeInsets.all(20),
    child: Column(
      children: [
        // Excelerate Header
        Row(
          mainAxisAlignment:
              MainAxisAlignment.center,
          children: [
            Column(
              children: [
                Container(
                  width: 30,
                  height: 4,
                  color: Color(0xFFFF6A3D),
                ),
                SizedBox(height: 3),
                Container(
```

```
            width: 30,
            height: 4,
            color: Color(0xFFFF6A3D),
          ),
          SizedBox(height: 3),
          Container(
            width: 30,
            height: 4,
            color: Color(0xFFFF6A3D),
          ),
        ],
      ),
      SizedBox(width: 10),
      RichText(
        text: TextSpan(
          children: [
            TextSpan(
              text: "excel",
              style: TextStyle(
                color: Color(0xFFFF6A3D),
                fontSize: 28,
                fontWeight: FontWeight.bold,
              ),
            ),
            TextSpan(
              text: "erate",
              style: TextStyle(
                color: Color(0xFFE91E63),
                fontSize: 28,
                fontWeight: FontWeight.bold,
              ),
            ),
          ],
        ),
      ),
    ],
  ),
  SizedBox(height: 10),
  Text(
    "Excelerate Learning Hub",
    style: TextStyle(
      fontSize: 22,
      fontWeight: FontWeight.bold,
    ),
  ),
],
```

```
    ),
  ),
)
```

Figure 2. Home Dashboard Development and Output

Purpose

Provides learners with an overview of opportunities and impact metrics.

Key Insight

The dashboard centralizes information and reduces navigation complexity.

Output

Figure 2 Screenshot

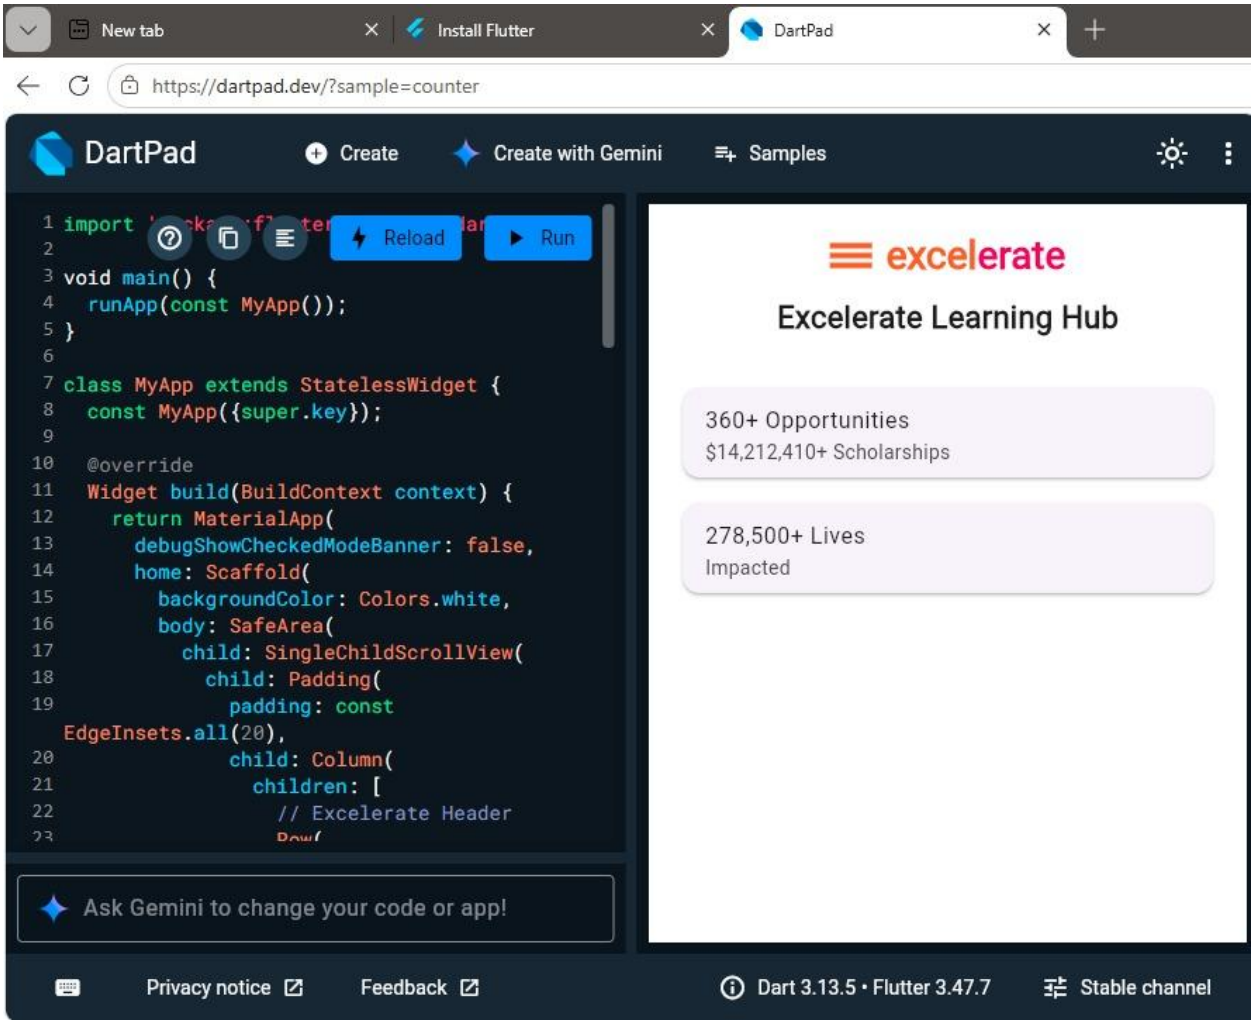

Figure 3. Quick Access Navigation Development and Output

Purpose

Provides quick navigation to major platform resources.

Key Insight

Improves discoverability and reduces the number of interactions required to reach key features.

Output

Figure 3 Screenshot

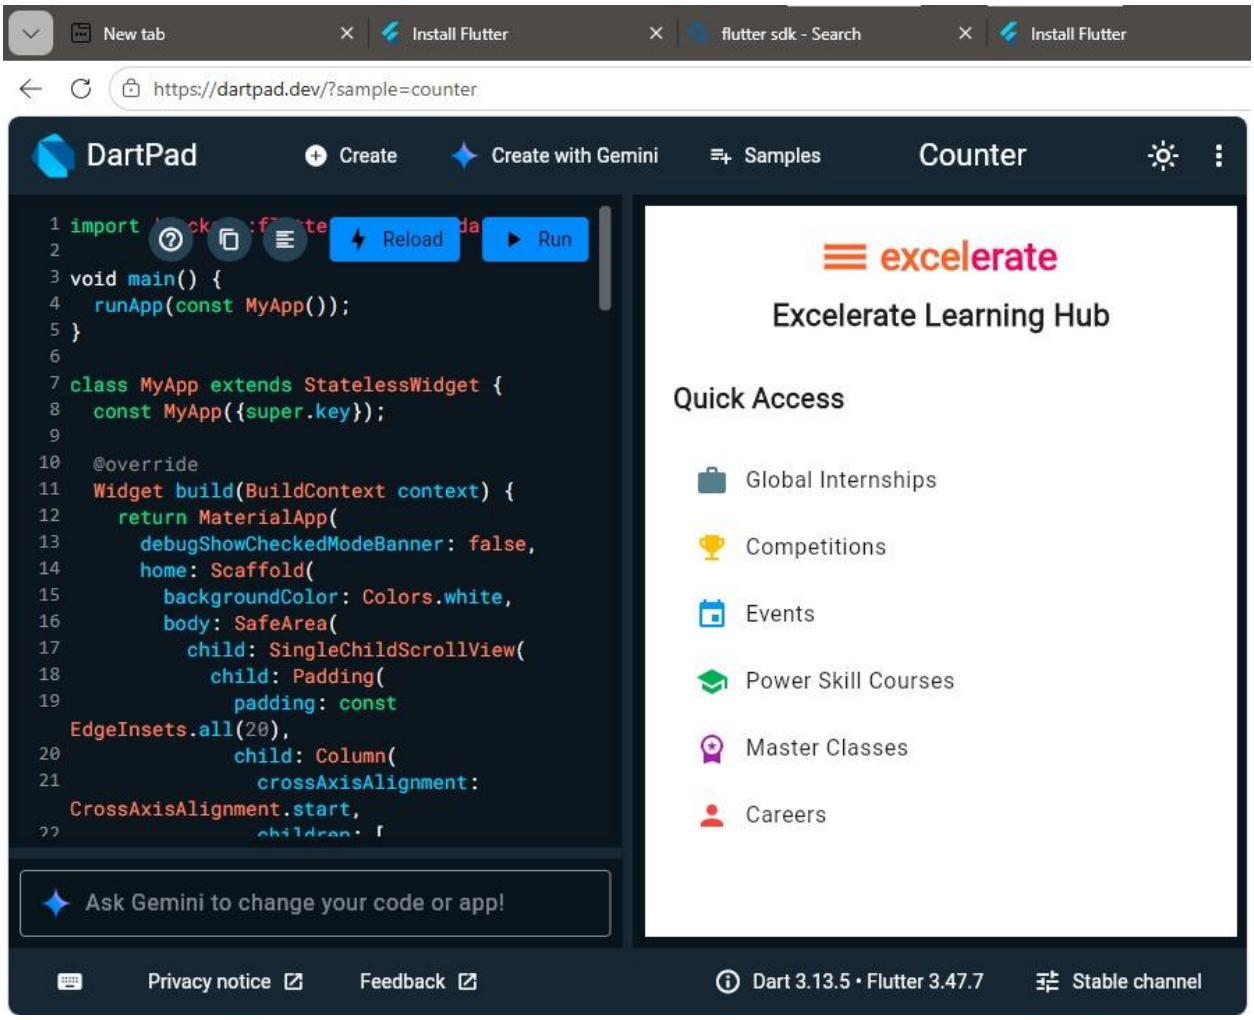

Figure 4. Opportunity Listing Development and Output

Purpose

Displays available internships, courses, and learning opportunities.

Key Insight

Supports opportunity exploration through structured content presentation.

Output

Figure 4 Screenshot

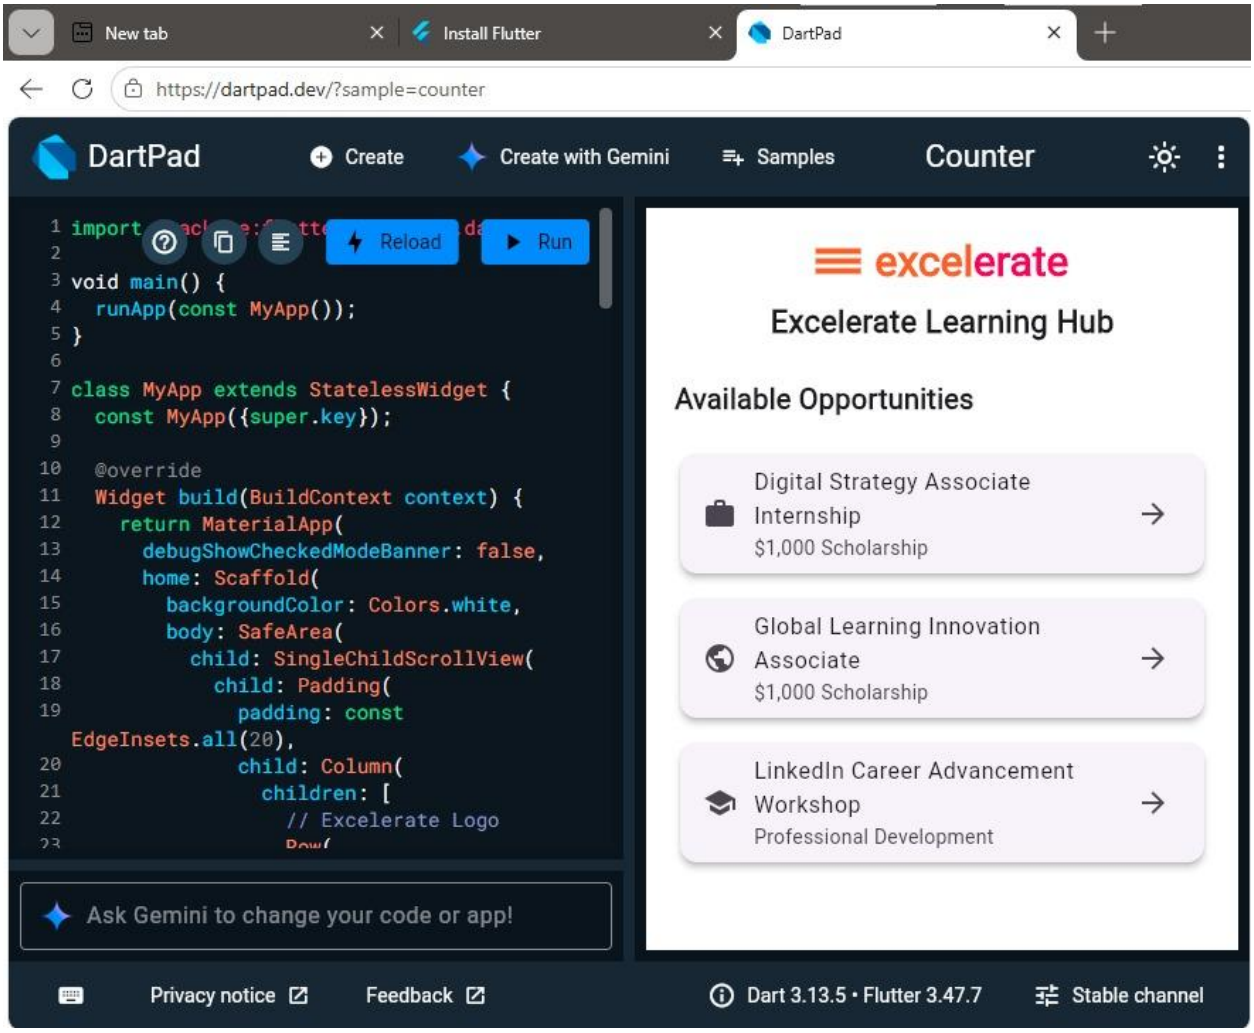

Figure 5. Search Functionality Development and Output

Purpose

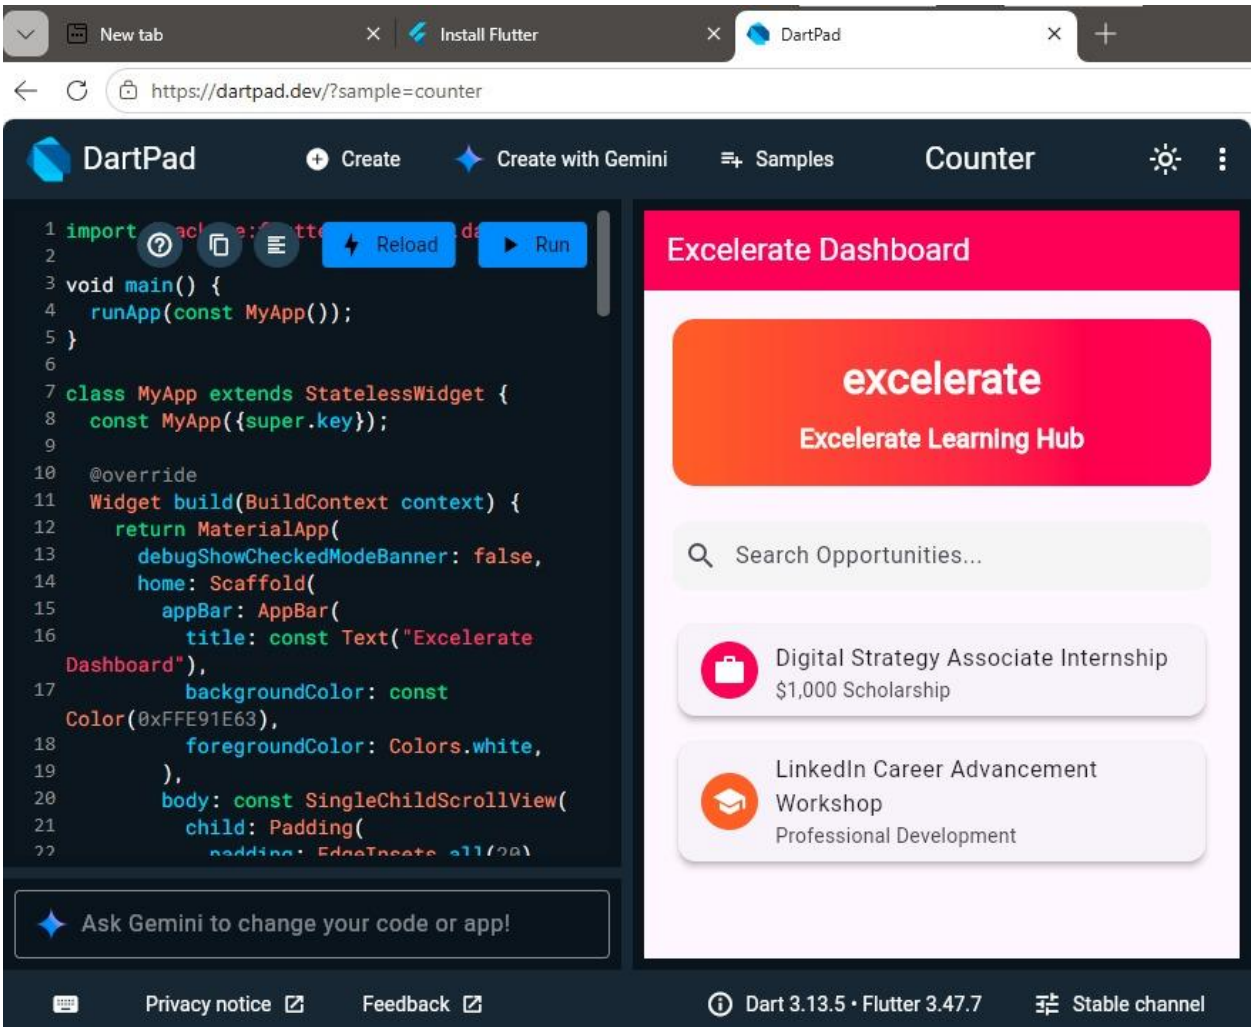

Allows learners to quickly discover opportunities using keywords.

Key Insight

Improves accessibility and enhances user efficiency.

Output

Figure 5 Screenshots

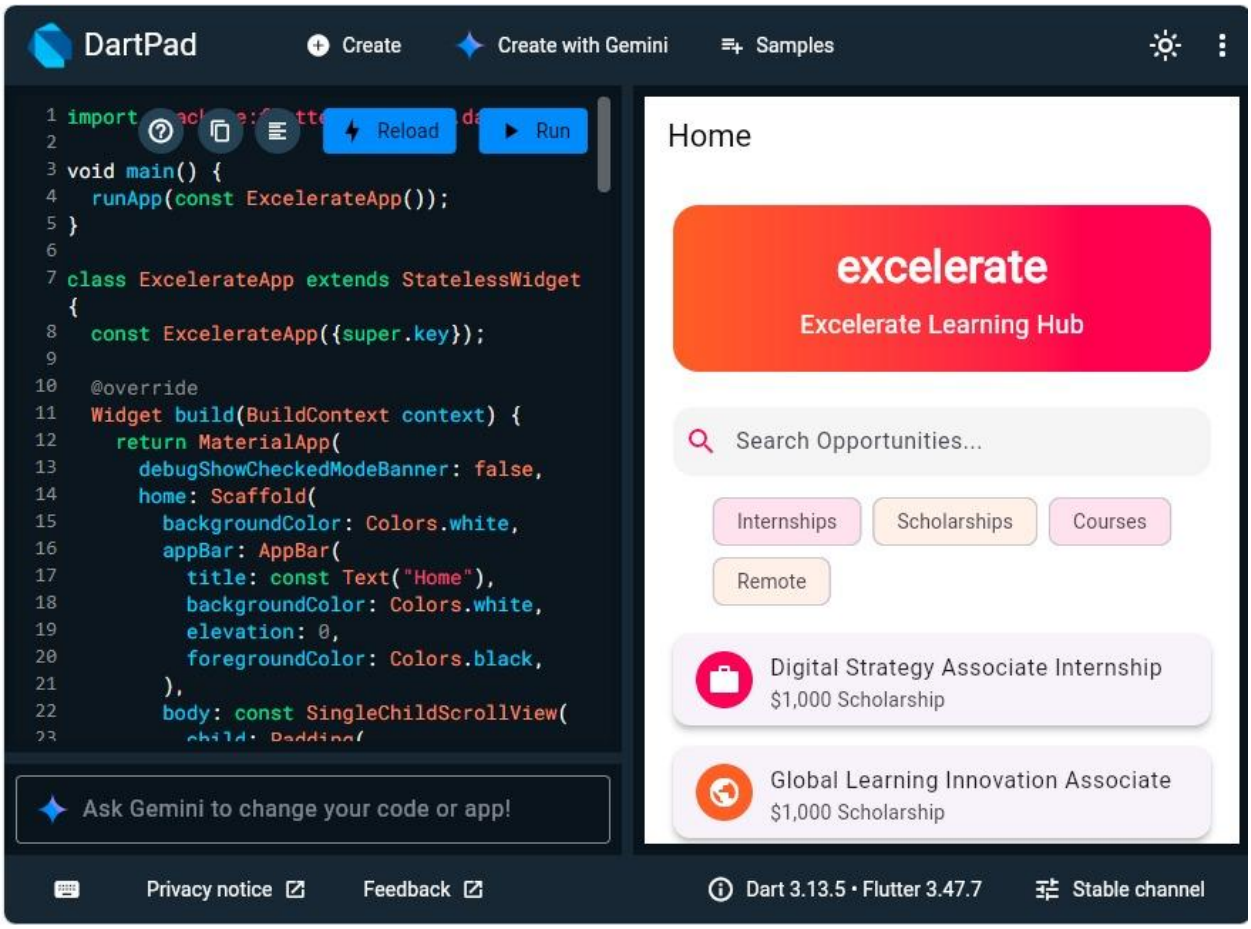

Figure 6. Opportunity Details Development and Output

Purpose

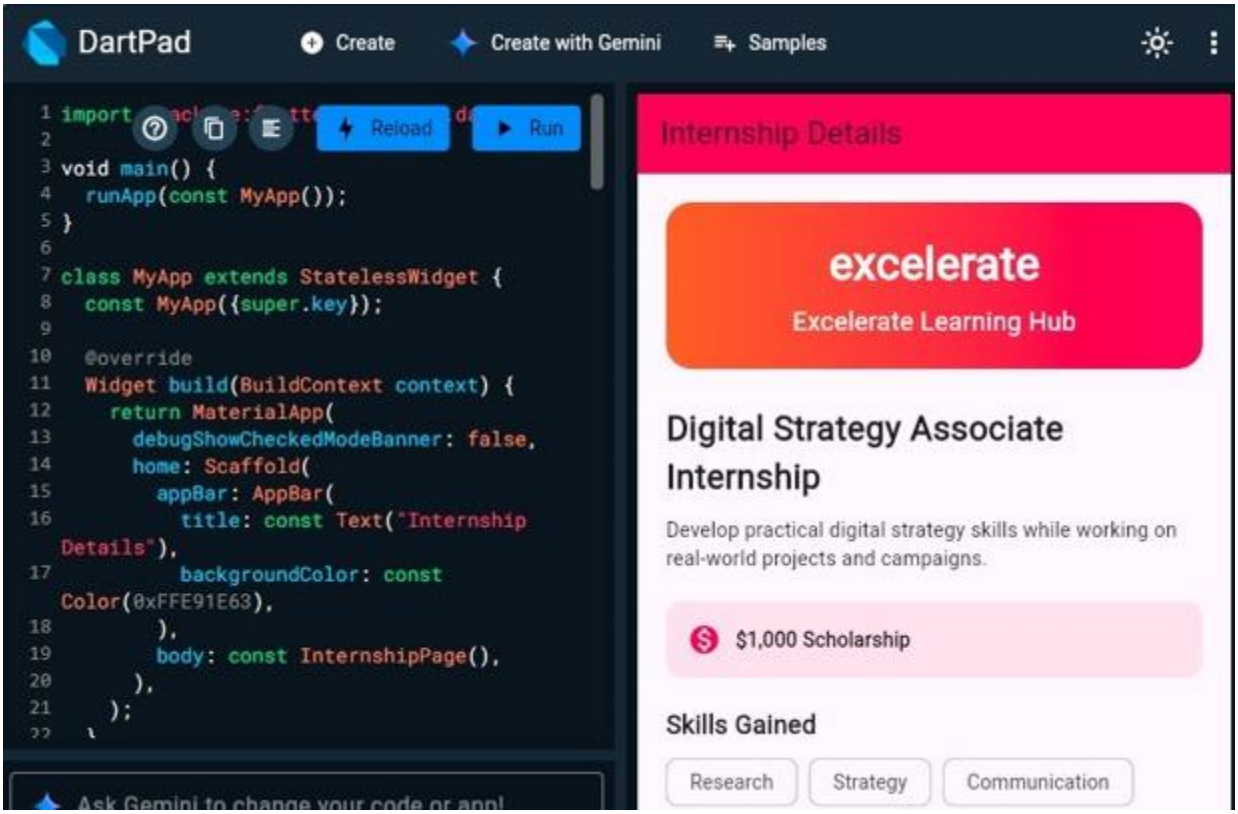

Provides detailed information regarding a selected opportunity.

Key Insight

Supports informed participation decisions by displaying descriptions, skills, and scholarship information.

Output

Figure 6 Screenshot

4. Complete Flutter Source Code

lib/main.dart

Code Structure Included

Login Screen

Home Dashboard

Quick Access Navigation

Opportunity Listing Screen

Search Functionality

Opportunity Details Screen

Navigation Components

5. Application Navigation Flow

Figure 7. Application Navigation Flow Diagram

Key Insight

The application follows a learner-centered journey beginning with authentication and progressing through opportunity exploration.

Diagram

6. Technical Implementation

Technologies Used

- Flutter SDK
- Dart
- Material Design
- GitHub

Flutter Components Applied

- MaterialApp
- Scaffold
- AppBar
- Column
- Row
- Card
- ListTile
- TextField
- ElevatedButton
- Navigator

---

7. Branding and Platform Alignment

The prototype was designed to align with the current Excelerate platform experience through:

- Dashboard-centered navigation
- Opportunity-focused workflows
- Internship and scholarship visibility
- Excelerate-inspired branding structure
- Consistent learner journey

Branding Limitation

During development, the Flutter preview environment applied default theme settings that affected the rendering of certain branding elements, including the official Excelerate logo and some custom color configurations.

To maintain alignment with the current platform, platform screenshots were included as visual references alongside the Flutter implementation outputs.

https://drive.google.com/file/d/13NRYrvRItnVUkfAitQBfV8m4X1iShoH/view?usp=sharing

10. Learning Outcomes

Through this activity, the following skills were strengthened:

- Flutter User Interface Development

- Mobile Application Design
- Navigation Planning
- Search Interface Design
- GitHub Version Control
- Technical Documentation
- User Experience Design

---

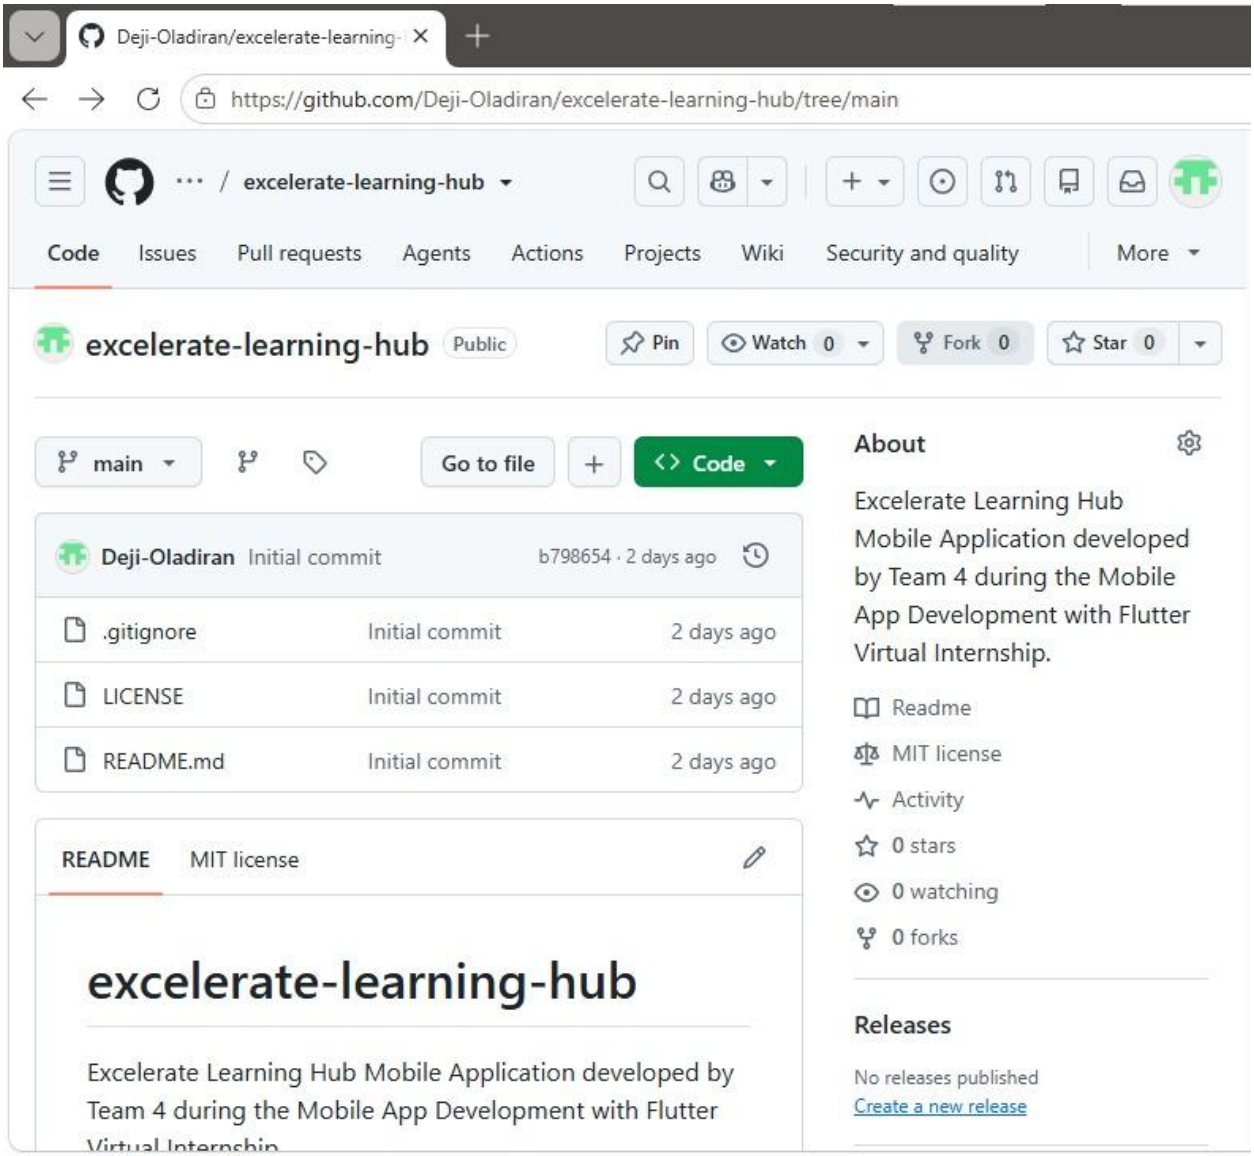

11. Conclusion

The Week 2 prototype successfully demonstrates the core functionality of the Excelerate Learning Hub application. The Login Screen, Home Dashboard, Quick Access Navigation, Opportunity Listing, Search Functionality, and Opportunity Details Screen collectively establish a strong foundation for future development.

The project successfully demonstrates user authentication, opportunity discovery, content exploration, navigation planning, and GitHub documentation practices using Flutter development concepts.
